Quadra-Chek® Digital Readouts

Know precisely

You can't make a more accurate choice.

Quadra-Chek® Digital Readouts **Metronics is the world's premiere developer of metrology software and digital readouts for measuring and inspecting 2D and 3D geometric components.**

Metronics Quadra-Chek systems are the standard control interface on the precision measuring devices of many of the world's leading precision metrology instrument manufacturers.

Quadra-Chek digital readouts support industries that call for precise measurement and inspection of 2D and 3D parts in single-sensor and multi-sensor environments. The products feature an intuitive user interface and simple, meaningful visual displays. Their design reflects a deep understanding of user needs and a uniform work process model that supports operators at every stage in the measurement process. Metronics digital readouts lead the precision inspection industry with innovations that improve operator productivity, reduce errors and save time and money.

Quadra-Chek 100 Series Digital Readouts A flexible, compact and precise digital readout for 1- to 4-axis measuring instruments. Ideal for measuring angular or linear dimensions.

Quadra-Chek 200 Series Geometric Readouts Our original digital readout with a fresh new interface and sleek design. A time-saving measurement tool with patented Measure Magic™ technology. Ideal for measuring 2D features.

Metronics develops world-class metrology software and geometric digital readouts. The Quadra-Chek product line provides unmatched support for single-axis and multi-axis dimensional measurement of 2D and 3D parts on both new and existing tool platforms. Quadra-Chek digital readouts and PC-based products integrate innovative user interface conventions, state-of-the-art ergonomics, powerful data import, export and analysis tools and are supported by an international team of field engineers.
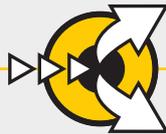

Intuitive interface design

Quadra-Chek products are based on insights gained from ongoing human factors research. They simplify repetitive tasks, visualize measurement data, and expand the possibilities of dimensional inspection processes. Intuitive work process models and operator interface design innovations extend programming, automation and measurement capabilities across instruments, advance new standards for ease-of-use, and reduce operator training time.

› Windows® platform

› Icon-based tools and toolbars
› Color coding
› Audio feedback
› Contextual help
› Intelligent, time-saving protocols
› IrDA communication

Powerful data management tools

Integral communication tools enable operators to record, store and analyze measurement data. Powerful features allow operators to selectively or historically document measurements in dimensioned photographs and schematic drawings, as well as to transfer measurement data efficiently among machines performing related tasks. Operators can also export data to online databases for offline analysis by managers and quality control specialists.

› CAD export
› SPC export
› CNC control
› Integrated databases
› Custom reporting

Global support network

Metronics field engineers, based in offices located all over the world, can assist in the onsite review of dimensional inspection requirements. Complete contact details are available online at **www.metronics.com**.

High-visibility LCD display A backlit LCD with .5" letter height is easy to read in diverse lighting situations and from indirect viewing angles.

Familiar interface Familiar, intuitive interface conventions were developed through ongoing operator research to simplify repetitive tasks and expedite the training process.

IrDA communications Remote control option allows the operator to download data to handheld devices.

Re-designed Quadra-Chek digital readouts incorporate a range of ergonomic and display interface innovations that advance new standards for ease of use.

HotKeys Two large, easy-to-reach buttons at the top of the console can be programmed to trigger an operator's most frequent data entry steps, simplifying measurements when the operator's attention must focus on the part.

Versatile display console
The slender monitor housing requires minimal space, whether on a desk or bracket-mounted directly to a measuring tool. Its sleek visual design complements contemporary metrology measuring instrument design.

Adjustable display angles
The monitor tilts to face standing or seated operators, whether mounted above, beside, or below an instrument.
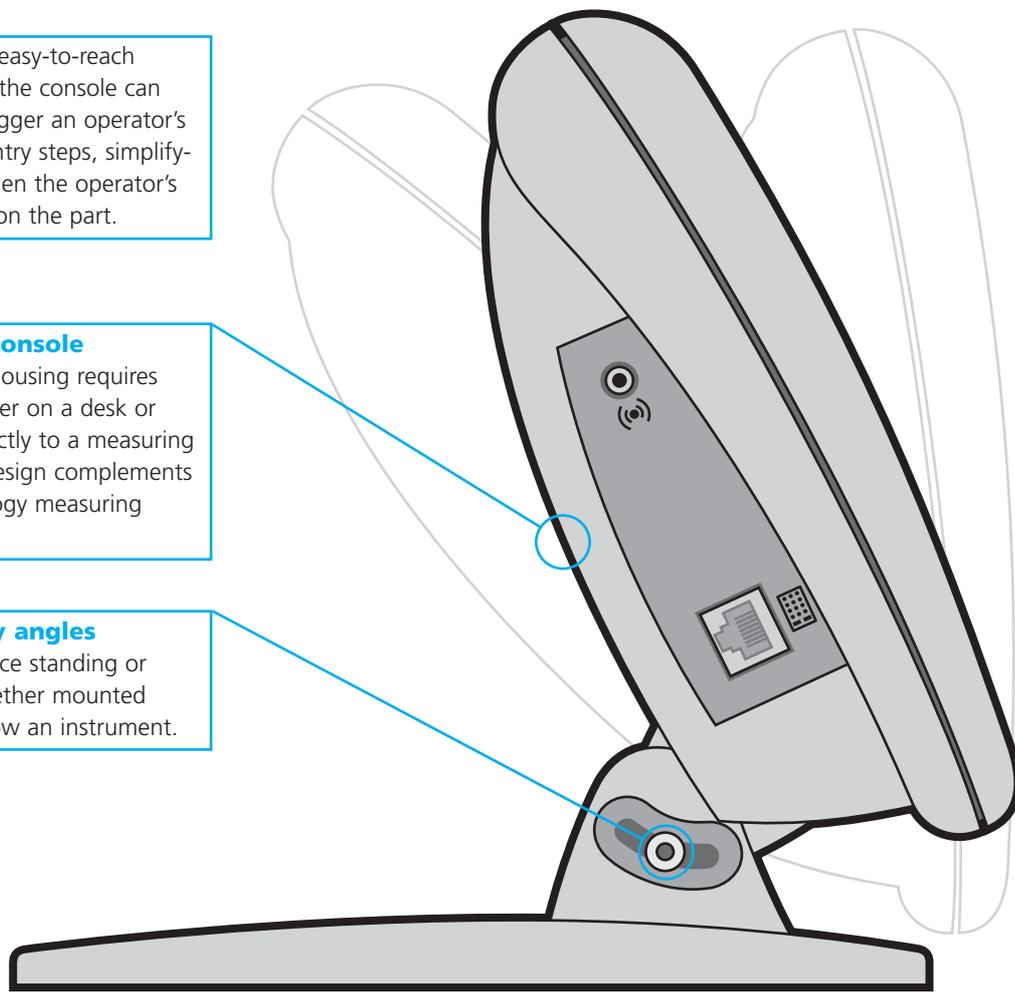

Maximum height: 7.5"

Base depth: 7.5"

Understand completely

Architecture The Quadra-Chek unique interface seamlessly incorporates the best tools and annotation conventions of previous Quadra-Chek products, reducing operator training time. Fast, familiar tools improve productivity and enhance measurement consistency throughout the entire measurement process.

Input Reduce operator subjectivity and fatigue, and enhance productivity, through the use of optical edge detection and automatic point entry.

Measurement Record desired feature and construction measurements quickly, easily and accurately with patented software features like Measure Magic.® Accelerate the measurement process with tools that automatically complete complex work steps.

Programming Simplify difficult and repetitive measurement sequences with robust, easy to use programming tools. Create step-by-step part programs using a simple self-teach mode to guide subsequent measurements.
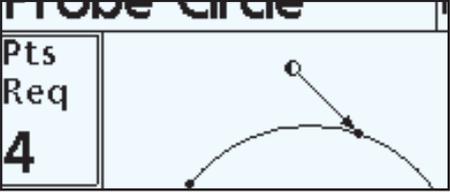

Modern metrology is a complex sequence of measuring, recording, analyzing and reporting dimensional data. The conceptual model underlying Metronics digital readout design organizes the workflow to support operators at every stage of the measurement process.
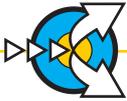

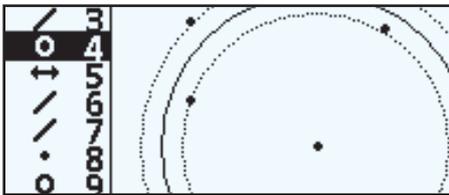

Data Management Manage measurement data in ways that reduce screen clutter, reveal meaningful information patterns and visualize the complex relationships among measured features.

Output Streamline communication among operators, management, dispersed departments and quality control teams. Send measurement information to a variety of applications, printers or databases. Exchange formatted data easily with partners or colleagues throughout the company and around the world.

Intuitive displays View measurement data easily on a crisp, clear, bright, black-and-white LCD designed for the contemporary metrology shop floor. Tilt the display for multiple viewing angles.

Consistent user interface Experience a proven interface consistent with other Quadra-Chek products that ensures operator accuracy and reduces operator training time.

Options Get the right tools for the job. Optional remote keypads, footswitches and printers help operators capture the precise measurement data more conveniently while streamlining the work process.

Sound feedback Listen for helpful sound feedback from a powerful built-in speaker. Different sound cues prompt operator action without interrupting work flow, speeding data entry.

Auto repeat (QC-200) Measure features and print the results on the fly. Improve productivity and recordkeeping, and share information throughout the company and around the world.
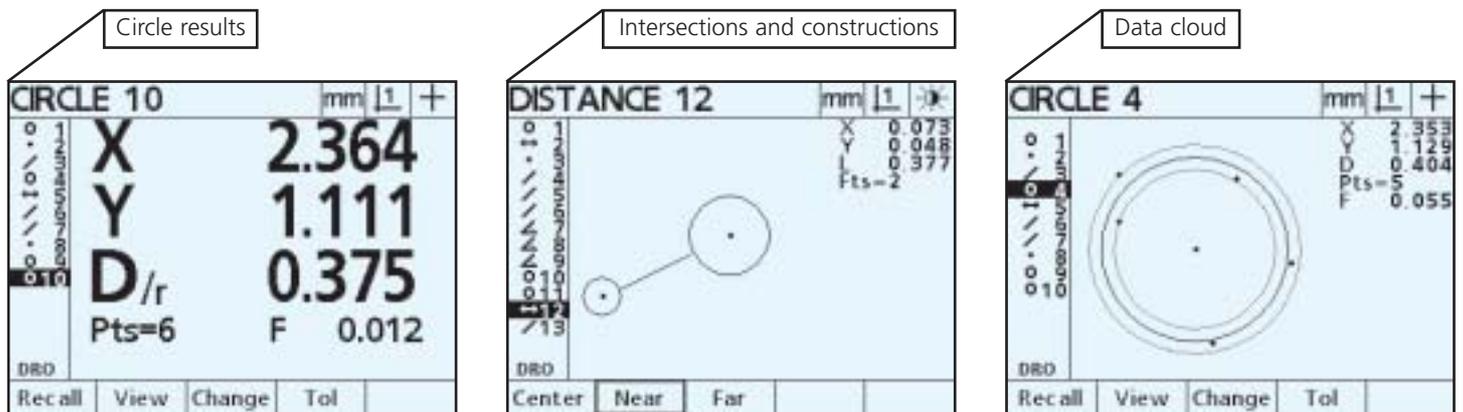

Foreign languages (QC-200) Communicate in five different languages. The QC-200 software accommodates English, Spanish, Italian, German, and French operators.

Context-sensitive help (QC-200) Decrease training time and costs with graphics-rich, context sensitive help that guides shop floor personnel through Quadra-Chek interface conventions.

Patented features reduce repetitive measures and simplify complex work steps.

Measure Magic® To measure, simply probe points and click. Quadra-Chek metrology software detects, without operator intervention, the feature type being measured. With this patented feature, operators can inspect multiple features without taking their eyes off the part which speeds throughput, improves accuracy and reduces user fatigue.

Intersections and constructions (QC-200) Obtain essential intersection and construction results by selecting from the list of previously measured features, complete with graphics.

Data cloud (QC-200) Improves the presentation of measurement data with graphic displays of measured features that reinforce operator comprehension by visualizing complex data sets.

Geometric tolerancing (QC-200) Use Quadra-Chek's unique graphic representations to instantly view pass/fail performance details for critical part dimensions.

Results Display important measurement data in an uncluttered, comprehensive display.

Quadra-Chek digital readouts feature an easy-to-use programming interface that helps streamline difficult and repetitive measures.

Programming Intuitive tools simplify the creation of programs that automate repetitive tasks, reducing subjectivity and enhancing productivity.

Part programming (QC-200) Quickly and easily create, edit and run part programs. Program a measurement sequence once and run it back as often as you need. Measure the same number of points per feature, in the identical sequence, part after part.

Measure guide (QC-200) Visual cues guide each feature measurement of a part, exactly and repeatably, to assure complete and consistent data collection.

Operators can easily format, analyze and communicate measurements throughout the company and around the world.

Data management Metronics digital readouts allow operators to easily analyze and communicate measurements throughout the department and the entire organization.

Print output Print measurement results using a serial or parallel printer in an easy-to-read 40- or 80-column format.

Data output Parallel and serial ports make it easy to transfer data to PCs, networks and printers, while the IrDA port can be used to download measurement data to handheld PDAs and notebook computers.

A flexible, compact and precise digital readout for 1- to 4-axis instruments. Ideal for measuring angular or linear dimensions. Can be used with inspection tools including optical comparators, measuring microscopes and coordinate measurement machines. *Shown with optional remote control.*

We serve industry and laboratories world wide, from major multinational corporations to small privately owned companies.

Each receives the same high standard of pre and post sales service, whether direct from one of Vision's subsidiaries or one of our highly trained and skilled distributors. With our products now represented in over 30 countries, Vision responds to customer demand with speed, efficiency and with innovative solutions.
