

## Notification of Spares Availability for 'Original' Mantis

Vision Engineering Inc. (VEI) is dedicated to supporting the service and repair needs of our customers, and we continually strive to provide the best value in spare parts and services. Included in this commitment is the policy of supporting our 'no longer manufactured' products for as long as commercially possible. However, with diminishing demand for spare parts for the 'Original' Mantis, it has become increasingly difficult to source and purchase a smaller volume of parts required to support this product forever.

### Statement of Spares Availability

Effective March 1, 2009, Vision Engineering Inc. is pleased to announce the continued availability of main serviceable & consumable parts for 'Original' Mantis stereo viewers for a 1 year period. After this date, this does not mean that spare parts & consumables will not be available; however this does mean they will be 'subject to availability'.

To schedule a repair or servicing of your 'Original' Mantis, or if you have any questions or concerns, please contact Vision Engineering at 800.644.7264 to discuss your particular situation.

### 25% Trade-in upgrade for 'Original' Mantis

In addition to providing ongoing spare parts and service support, Vision Engineering is also pleased to announce a substantial trade-in program for existing 'Original' Mantis customers. For a limited period, customers can trade-in their existing 'Original' Mantis unit(s) for a **25% discount** on **Mantis Compact** or **Mantis Elite** replacement units. Please see separate '**Original' Mantis Trade-in document** for full details, or contact us at 800.644.7264.
