

MAINTAINING AN ERGONOMIC WORKSTATION

4 reasons to re-assess

The Human
Factor

1

People

New operators work in new ways. Increased workloads affect operator performance.

RE-ASSESS OPERATOR
FAILURE

Changing
Processes

2

Process

Processes alter as products are adapted to improve performance or as quality control requirements develop.

RE-ASSESS OPERATOR
ACTIVITIES

Routine Risk
Assessment

3

Routine

Any routine risk assessment should incorporate a review of workstation design to ensure the set-up is still fit for purpose.

RE-ASSESS WORKSTATION
PERFORMANCE

Changing
Technology

4

Upgrades

Technology is ever-evolving resulting in upgrades to existing equipment or the purchase of new systems.
